

1 Year Fixed Rate Relief

Temporary relief from interest-rate pain.

Eligible homeowners will get a golden opportunity in today's high-rate environment to enjoy a full year of lower mortgage payments, with the chance that market rates will be lower upon renewal

Reported beneficial side effects:

- Works 24/7 for a full year (from date of funding)
- Reduced principal inflammation compared to current rate (more of your payment goes to principal)
- Decreased anxiety due to easier budgeting from improved cash flow
- Improved motivation to make small home updates, like adding blinds or a nice picture
- Increased relaxation while getting used to lower payments

Rate Relief™ may be right for you, if:

- You're buying a home or looking to switch at renewal
- Your mortgage is insured or insurable
- You're looking for a short-term, low-rate option
- Your home value is below \$1M, or your original mortgage default insurance is still valid (through CMHC, Canada Guaranty or Sagen)
- Your amortization is 25 years or less
- You still want a full-featured mortgage with your lower rate

Low Fixed Rate 1-Year Mortgage

"There is no lower rate in Canada. The product appears to have no unusual restrictions other than those noted here; THINK Financial will guarantee your rate for 120 days after you apply."
